# DMK Skin Care

“DMK believes that the origin of most skin conditions is a result of disharmony within the skin. Using the principles of biochemistry, DMK has formulated a range of treatments and products designed to educate skin to perform like youthful healthy skin. By matching formulations with the body's chemistry, the skin is encouraged to respond in a positive manner. DMK's revolutionary concept of REMOVE, REBUILD, PROTECT, MAINTAIN aims to match an individual's biochemistry with the appropriate skin therapy. Transdermal, Botanical-based paramedical products make up the DMK skin care program.”

## REMOVE

Remove the dead skin cell build-up, which leads to the appearance of dry skin, fine lines, congested skin or skin discoloration. DMK uses enzymatic hydrolysis, a treatment that transforms dead cell material into a weak acid and flushes it away, bringing new skin cells to the surface.

## REBUILD

Rebuild skin by encouraging the skin's vital internal processes to function optimally, enabling cells to stay alive longer and perform at their highest potential, creating healthier, younger looking skin. DMK oils, serums, spritzes and crèmes work directly on the skin cells with DMK's unique 'direct delivery'. These are designed to provide natural skin tone and moisture.

## PROTECT

Protect the skin from the sun, free radicals, glycation and other environmental factors that lead to premature ageing using potent natural antioxidants.

## MAINTAIN

Maintain beautiful skin with DMK Home Prescriptives which work to prolong the results achieved by DMK Professional Treatments. The DMK concept provides clients with lifelong skin management programs to incorporate into their daily lives.
